## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis for this rejection is set forth in a two-prong test of : (1) Whether the invention is within the technological art: and (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that don not apply, involve, use, or advance the technological arts fail to promote the “progress of science and the useful arts” (i.e., the physical science as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 1-20 only recite an abstract idea. The recited steps of merely paying, placing, does not apply, involve, use, or advance the technological arts since the recited step can be performed in the mind of user or by use of a pencil and paper. Since the claimed invention, as a whole, is not within the technological arts, claim 1, and claims depending from are deemed to be directed to non-statutory matter.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Brizendine et al. U.S. Patent No. 6,484,147.

Regarding claims 1-20, Brizendine teaches placing a percentage of credit card sales in a bank account..., paying a percentage of credit card sales at a predetermined period, applying for a credit card, issuing a credit card, charging the credit card holder an amount, accumulating points...converting the points to dollars, requesting redemption of the points accumulated, etc. (see fig. 1-15 and col. 1 line 55 to col. 2 line 11, col. 3 line 61 to col. 10 line 50 and col. 12 line 3 to col. 14 line 22).

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Simpson U.S. Patent No. 6,070,153 teaches automatically investing a portion of a credit card interest charged amount in an investment account.

Barton U.S. Patent No. 6,164,533 teaches points of sale automatic savings program contribution system.
